Important Information:

- [1]System memory: 64-bit operating system is required to support 4GB or more of system memory.
- [2]Graphics and system memory: Significant system memory may be used to support graphics, depending on system memory size and other factors.
- [3]Hard drives (GB and TB): GB means 1 billion bytes and TB means 1 trillion bytes; actual capacity varies with preloaded material and operating environment and will be less.
- [4]Gigabit Ethernet: This term does not connote an actual operating speed of 1GB/sec. For high speed transmission, connection to a Gigabit Ethernet server and network infrastructure is required.
- ProSupport and ProSupport Plus: Availability and terms vary by region. See www.dell.com/servicecontracts/global.
